ESCALATION DELAY RISK

ONE OF THE MOST DANGEROUS RISK IS:

Waiting too long to escalate.

What is Escalation Delay Risk?

Risk created when a known issue is not escalated early enough.

Common causes:

- Trying to solve alone
- Fear of overreacting
- No clear escalation matrix
- Poor communication
- Waiting for business hours

WHY ESCALATION DELAY IS DANGEROUS?

Delay can lead to:

- SLA breaches
- Data corruption
- Security exposure
- Major incidents
- Customer dissatisfaction

Escalate based on:

✓ Impact potential

✓ Business risk

✓ Customer impact

Not based on:

✗ Ego

✗ Fear

✗ Assumption

Overall: Early escalation reduces total damage.

The failure isn't always the system.

Sometimes it's the delay.
